

Ex.No:1: Simulation of FDMA in MATLAB

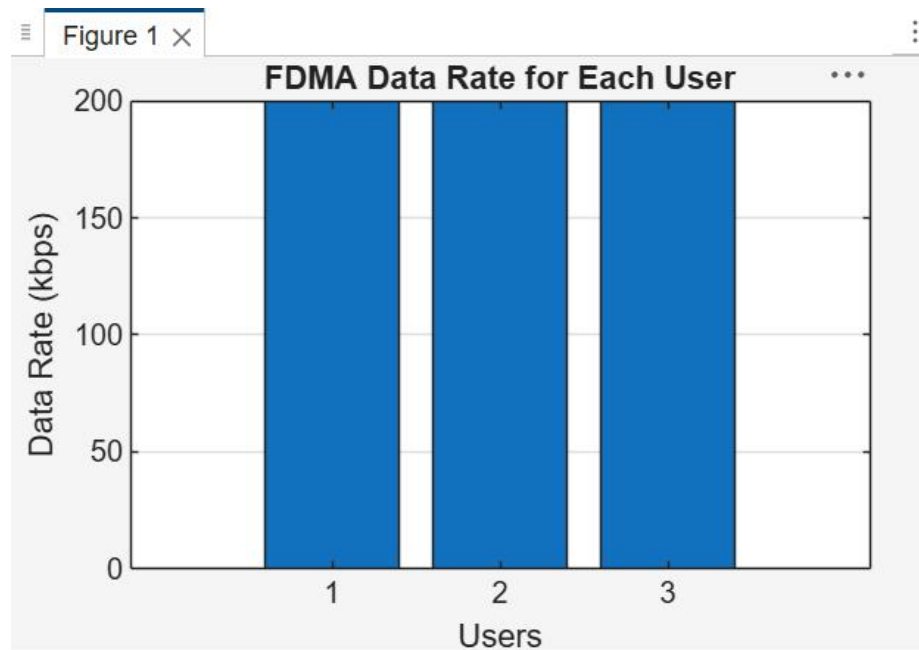

Objective 1:

To simulate an FDMA system by allocating individual frequency channels to multiple users and determine the channel bandwidth assigned to each user.

Objective 2:

To calculate the data rate achieved by each user in the FDMA system based on the allocated channel bandwidth.

Objective 3:

To evaluate the communication quality of the FDMA system by calculating the Signal-to-Noise Ratio (SNR) for different users.
